Agnes Peter Stamm, 2016-10-25 Peter Stamm's best-selling debut novel, Agnes, now available for the first time in the United States. Write a story about me, Agnes said to her lover, so I know what you think of me. So he started to write the
story of everything that had happened to them from the moment they met. At first, he works with Agnes to create a narrative that is most true to life, but as time passes and he grows more enamored with the narrative he has begun, he continues writing on his own, imagining a future for them after he reaches the present. Happy couples do not necessarily make for compelling reading, and as Agnes sees the unexpected plot he has planned for her, the line between fiction and reality begins to blur. In this unforgettable and haunting novel Stamm incisively examines the power of storytelling to influence thought and behavior, reaching a chilling conclusion.

Outdoor Science Lab for Kids Liz Lee Heinecke, 2016-06 Learn physics, chemistry, and biology in your own backyard! In Outdoor Science Lab for Kids, scientist and mom Liz Heinecke has created 52 family-friendly labs designed to get you and yours outside in every season. From playground physics to backyard bugs, this book makes it fun and easy to dig into the
natural sciences and learn more about the world around you. Have fun learning about: the laws of physics by constructing and using a marshmallow catapult. Centripetal forces by swinging a sock filled with gelatin snack and marbles. Earthworms by using ground mustard seed dissolved in water to make them wriggle to the surface. Germination by sprouting a sapling from a pinecone or tree seed. Surface tension and capillary action by growing baking soda stalagmites and stalactites. Many of the simple and inexpensive experiments are safe enough for toddlers, yet exciting enough for older kids, so families can discover the joy of science and STEM education together. Outdoor Science Lab for Kids was a 2017 Finalist for the AAAS/Subaru Prize for excellence in science books. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids.

*The Awful German Language* Mark Twain, 1880-05-15 “The Awful German Language” is a humorous examination of the German language and the frustrations a native English speaker may have when learning it. The essay was published as Appendix D of “A Tramp Abroad” by Mark Twain in 1880.

Process and Experience in the Language Classroom Michael Legutke, Howard Thomas, Christopher N. Candlin, 2014-06-06 Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process. The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice. They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice, incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources. Building on a critical review
of recent language teaching principles and practice, they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience. The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum.
